Intelligent planning made easy

P-O Östberg, p-o.ostberg@biti.se, +46 (0)70-999 22 89

The Problem and The Solution

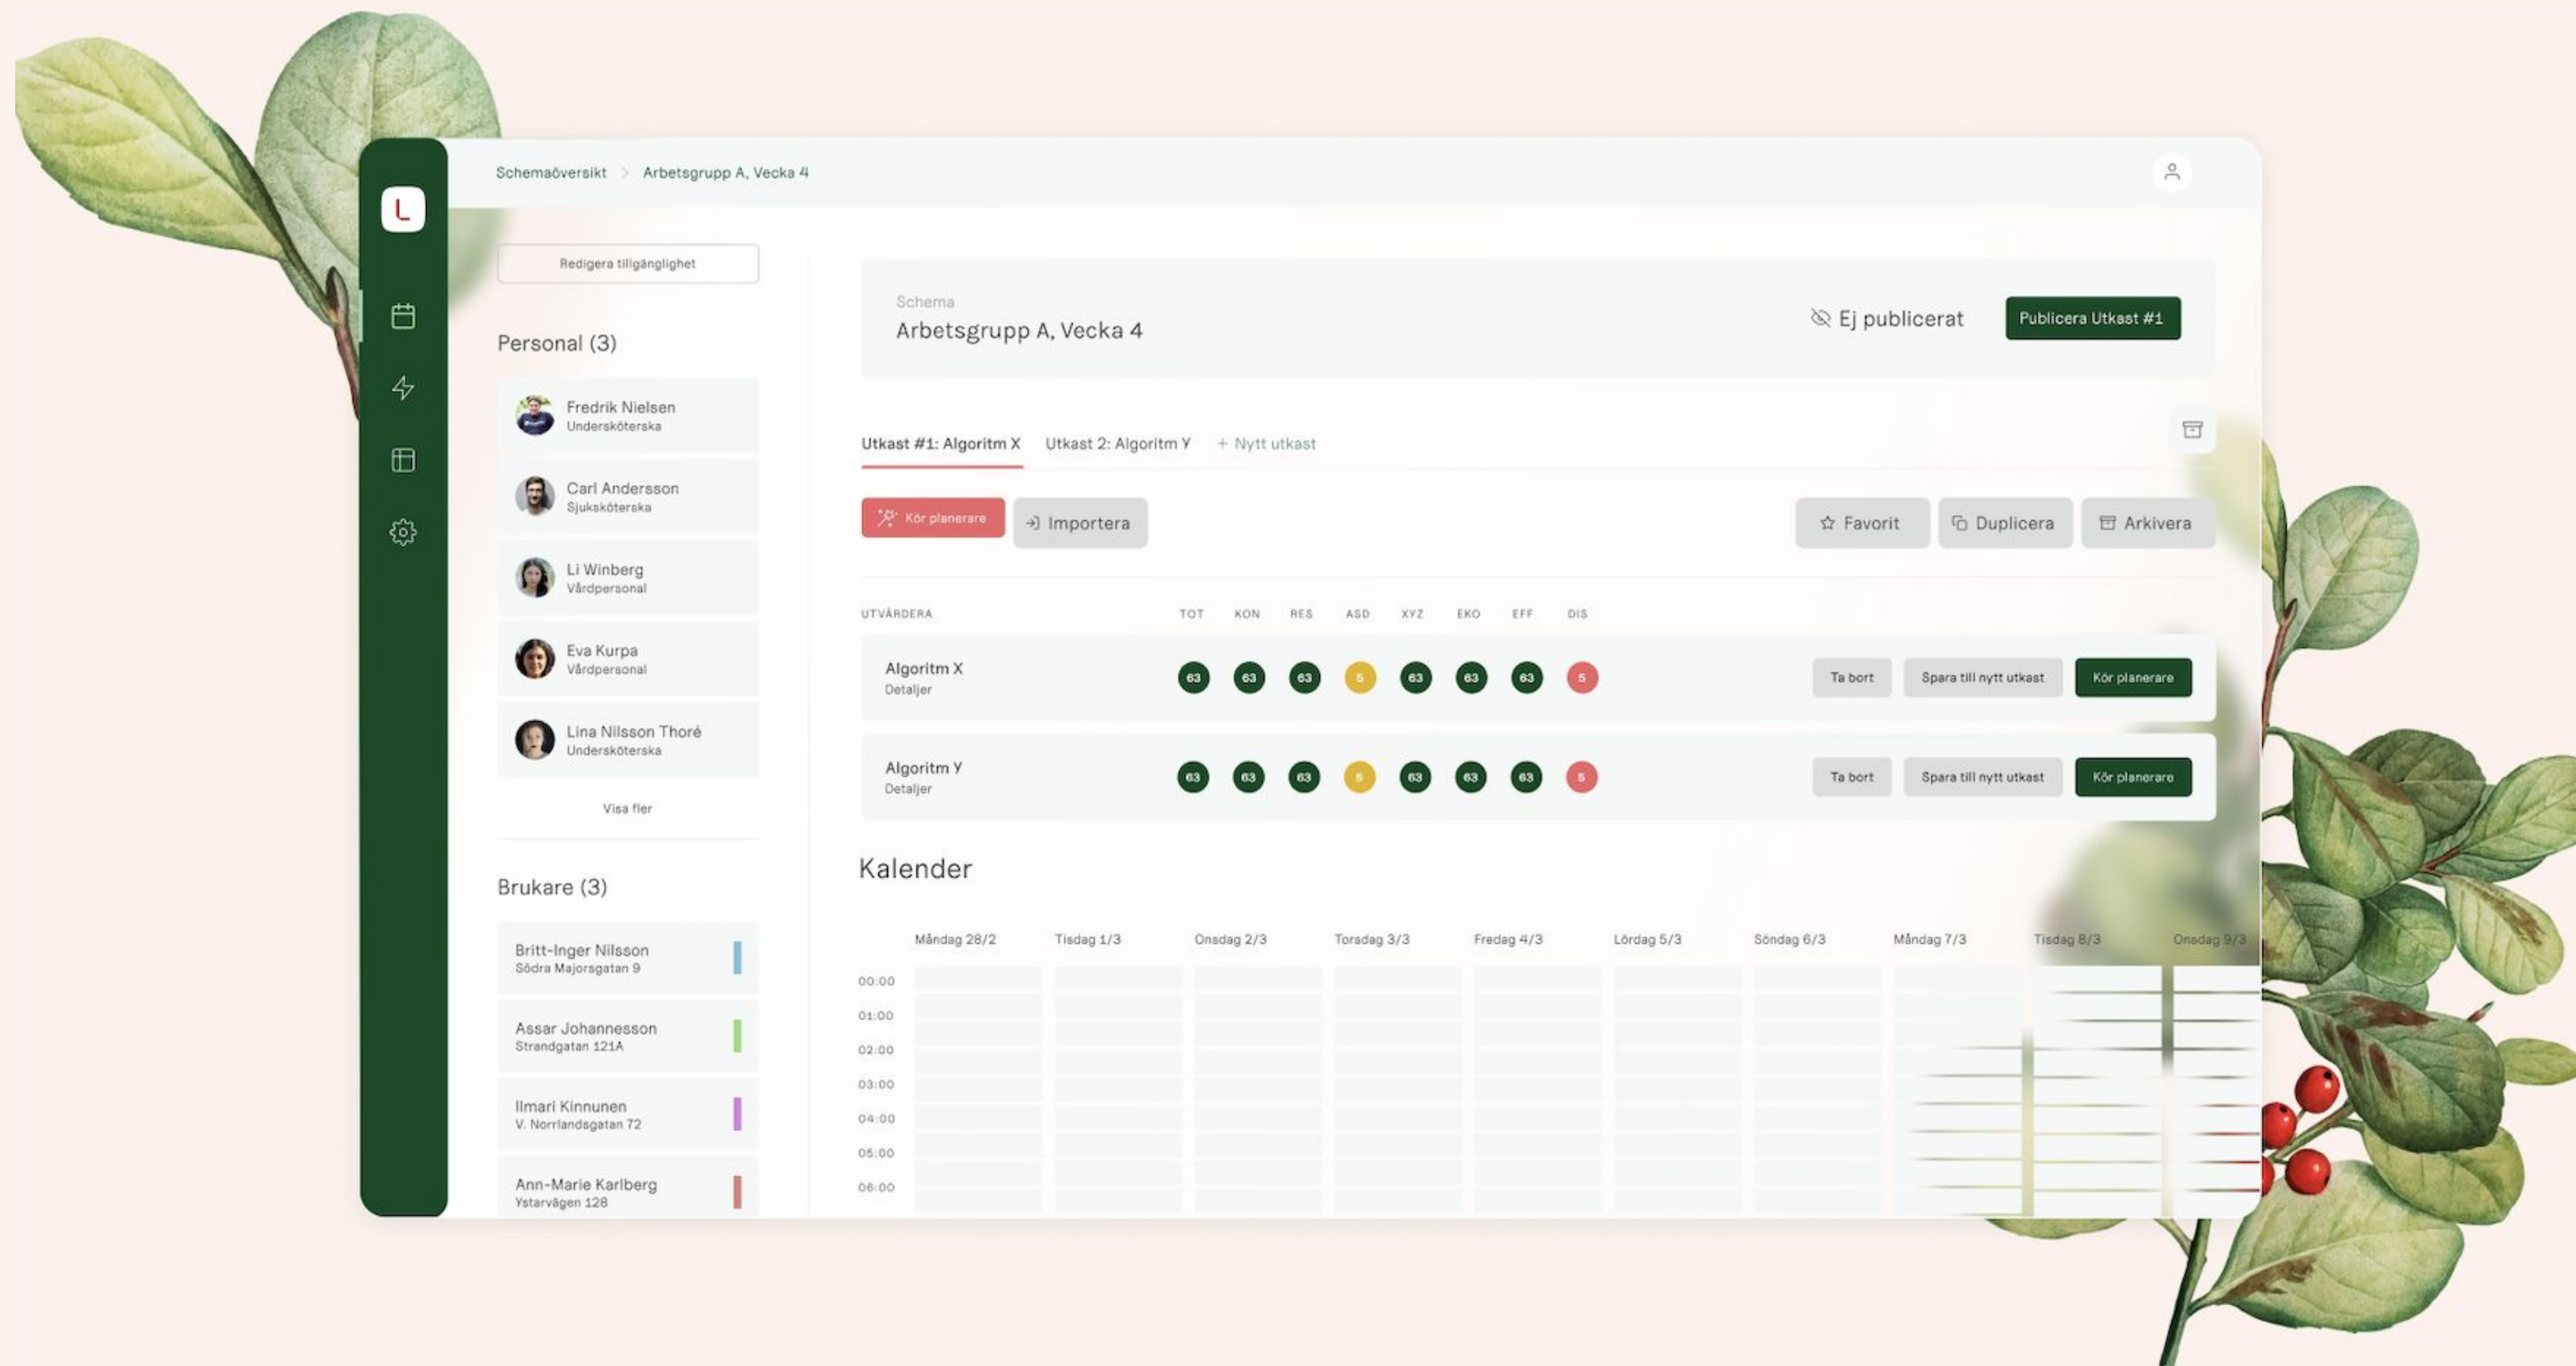

WHY: Society is becoming increasingly complex and digital development pressures organizations to remain competitive. For this, planning is a critical element for success.

HOW: Cutting-edge research-based AI technology for home care providers. Transfer AI-based planning automation, optimization, and visualization tools suitable for homecare.

WHAT: Smart planning and decision support system. Focuses on facilitating complex planning, helping homecare providers to better understand, plan for, and automate work processes.

All information in once place

Unique identity cards with systemintegration

Create identity cards for employees and care recipients. Fill in preferences and requirements. Time for visit, allergies, preferences of employee and more. The system generates schedule proposals according to the identity cards.

Your resources are unique

Generates a variety of schedule proposals

Lingon helps the organization to automatically generate schedule proposals and plan according to organizational goals. Staff continuity, route optimization, efficiency and more.
